

GCL SI

Conflict Minerals Statement

GCL SI Conflict Minerals Statement

GCL System Integration Technology Co., Ltd (“GCL SI”) is committed to operating a supply chain free of “Conflict Minerals”, which include gold, tin, tantalum, and tungsten and their derivatives whose extraction and trade are financing conflict in the eastern Democratic Republic of the Congo (“DRC”) or an adjoining country. As a globally renowned company, GCL SI considers it its responsibility to prevent armed groups in the DRC and adjoining countries from benefitting from the sourcing of Conflict Minerals from that region. When we use these materials in the production of PV modules, especially tin-plated copper, we require suppliers to trace the origin of the minerals and to assure that the GCL SI Conflict of Mineral Policy is complied with. All suppliers shall use their best effort to eliminate the use or sale of Conflict Minerals. Whether in the form of raw materials, by-product, semi-manufactured products, or finished products, all suppliers shall not sell, directly or indirectly, any Conflict Minerals to GCL SI.

GCL SI attaches great importance to the issue of Conflict Minerals and has a strong commitment to conducting our business in compliance with applicable laws and regulations and condemn human rights abuses associated with the extraction, transport, or trade of minerals. All associates are encouraged to report any actual or potential violation of GCL SI Conflict of Mineral Policy. If you wish to report any such matter anonymously, please submit a report of the suspected violation or other complaint or concern to: <http://www.gcl-power.com/en/contact/lzxx.html>.
